## VHR-115

## General Description

VHR-115 is a dense, rigid material produced in multi-ply construction from unbleached kraft pulp and acrylic polymer. It has excellent dielectric and mechanical strengths, low water absorption and is free of conducting particles, chemical impurities and foreign matter. Its chemical cleanliness accounts for its excellent aging characteristics in air up to $115^{\circ} \mathrm{C}$.

VHR-115 can be used in numerous coil, transformer, motor, electrical hardware and electronic applications where excellent dielectric and physical strengths are required.

VHR-115 is approved by Underwriters Laboratories reference E-31556(M) electrical use at $115^{\circ} \mathrm{C}$ and mechanical at $110^{\circ} \mathrm{C}$.

VHR-115 is available in sheets, strips, mill rolls and slit rolls in thicknesses from . 010 " to $.062^{\prime \prime}$.
PHYSICAL, ELECTRICAL AND CHEMICAL PROPERTIES:

| Fiber Content | $100 \%$ Unbleached Kraft Wood Pulp |
| :--- | :--- |
| Ash Content (Max.) | $.75 \%$ |
| pH Water Extract | $6.5-7.5$ |
| Moisture Content | $7.0 \%$ Avg. |
| Water Absorption \% change in wgt. 24 hrs max | 2 hours $50 \%$ <br> 24 hours 60\% |
